

DEV BHOOMI INSTITUTE OF TECHNOLOGY

DEHRADUN, UTTARAKHAND

Event Report (Academic Year: 2019-20)

Event Title:	Expert Lecture on Power Substation Designing	
Event category (Workshop/Guest Lecture/Seminar/Education Visit)	Expert Lecture	
Objective of the Event	Conducting expert lecture on “ Power Substation Designing ” about the working of substation is a part of an electrical generation, transmission and distribution system.	
Outcome of the Event	Students in fields learn about Substations transform voltage from high to low, or the reverse, or perform any of several other important functions. Between the generating station and consumer, electric power may flow through several substations at different voltage levels. A substation may include transformers to change voltage levels between high transmission voltages and lower distribution voltages, or at the interconnection of two different transmission voltages.	
Resource Person/ Expert and Organization	NAME	Mr. Atul Kale
	Organization	Samarth Electrical Control , UK
Number of Participants	23(EEE)	
Date & Venue of Events:	19 Feb, 2020	
Event Coordinator	Mr. Pankaj Aswal
