Event Report(2015-16)

Name of Department	Master of Computer Applications
Category of event organized	Workshop
Title of the event	Two Days workshop on Bootstrap and Jquery
Date of event organized	15-03-2016
Name of event coordinator	Mr. Rakesh Kumar
Class of participant	MCA 1 st Year and 2 nd Year
No.of Participant	62
Name of Expert	Technical Trainer
E-mail Id of Expert	
Designation and Adress of the expert	Technical Trainer, Technetro Noida
Objective of the event	<ol style="list-style-type: none">1. Basic Knowledge of Bootstrap which use in front-end web development.2. How JQuery used in the project.3. Types of framework in Bootstrap
About of the Event	<p>It was an intuitively workshop. Coach begun the workshop with Bootstrap & JQuery and how it is utilized in web advancement their focal points. He clarified the preferences and enhancements that it can bring to day by day lives, and how it'll advantage individuals independent of their branch. Student got the essential presentation on this like. Bootstrap may be a capable toolkit - a collection of HTML, CSS, and JavaScript apparatuses for making and building web pages and web applications. It may be a free and open source venture. The reason of jQuery is to create it much simpler to use JavaScript on your site. jQuery takes a part of common errands that require numerous lines of JavaScript code to achieve, and wraps them into strategies that you simply can call with a single line of code. jQuery too rearranges a parcel of the complicated things from JavaScript, like AJAX calls and DOM manipulation.</p>
Outcome of the event	<ol style="list-style-type: none">1. The bootstrap method uses a very different approach to estimate sampling distributions.2. Create anonymous functions and closures, and use them to store and access local data.3. Create event listeners and callbacks to respond to user-interface and network events.4. Apply the jQuery AJAX interfaces and JSON to upload data to a back-end web server, and to asynchronously retrieve and display responses.
